		Leigh C.		1623						
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Interference No. 105,065 has been terminated by a decision favorable to Applicant. *Ex* parte prosecution is resumed. Claims 1-12 are allowed for reasons of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a composition comprising (1) and indicator molecule coupled to glycogen; (2) "sufficient" salt; and (3) alcohol. The preamble recites that the composition is for precipitating nucleic acids. However, as disclosed in the specification, the necessary amount of salt depends on the amount of nucleic acid to be precipitated, and this amount is not specified in the claim. Furthermore, the specification further states, "It may not be necessary to add any salt if nucleic acid is present in the reaction at high amount." Because the amounts of the components depend on the amount of nucleic acid to be precipitated, the metes and bounds of the claims as recited cannot be determined.

Application/Control Number: 08/724,631

Art Unit: 1623

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Sotiroudis et al (Eur. J. Biochem., 1978).

Sotiroudis discloses a composition comprising glycogen covalently bound to phosphorylase b, an enzyme (a protein), citrate and mercaptoethanol. See abstract and page 577. The specification defines an indicator molecule as "any molecule, that can be coupled to a suitable carrier and can be either directly visualized or visualized by excitation with incident light of a suitable wavelength." Proteins are well known to be quantitated by visualization with UV spectroscopy at 280 nm.

Examiner's hours, phone & fax numbers

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leigh Maier whose telephone number is (571) 272-0656. The examiner can normally be reached on Tuesday, Thursday, and Friday 7:00 to 3:30 (ET).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Anna Jiang (571) 272-0627, may be contacted. The fax number for Group 1600, Art Unit 1623 is (571) 273-8300.

Visit the U.S. PTO's site on the World Wide Web at http://www.uspto.gov. This site contains lots of valuable information including the latest PTO fees, downloadable forms, basic search capabilities and much more. Information regarding the status of an application may be obtained from the Patent Application Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for

Art Unit: 1623

unpublished application is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197.
